github.com/moonman369 | moonman.in | [LeetCode \(400+\)](https://leetcode.com/moonman369)

Backend-focused Software Engineer with experience building scalable microservices, AI-assisted developer workflows, and cloud-native enterprise integrations using Java, Spring Boot, .NET, and Azure technologies. Strong foundation in distributed systems, GenAI, RAG pipelines, and Data Structures & Algorithms with a proven track record of delivering high-impact engineering solutions in production environments.

TECHNICAL SKILLS

Languages: Java, Python, C#, JavaScript/TypeScript, Golang

Frameworks & Libraries: Spring Boot, .NET Core, Node.js, Express.js, React.js, LangChain, OpenAI SDK, Azure Foundry

Databases & Messaging: MongoDB, Azure Cosmos DB, MySQL, Redis, Qdrant (Vector DB), ActiveMQ

Cloud, DevOps & Tools: Azure Integration Services, Docker, Git, RESTful APIs, Microservices Architecture, Concurrency

Core Competencies: Data Structures & Algorithms, Agentic AI, RAG, Prompt Engineering

EXPERIENCE

Tata Consultancy Services (TCS)

Systems Engineer (Azure Integration Developer)

Aug 2023 – Present

Kolkata, WB

- Designed and deployed **20+** resilient microservices using **Java Spring Boot** and **.NET** for a major UK-based retail client, leveraging AI-assisted development to deliver scalable, maintainable, and low-latency systems optimized for concurrency.
- Built a fully functional **Multi-Agent AI** orchestration prototype using **Azure AI Foundry**, **Azure Integration Services**, and **VanillaJS** to automate planning, code generation, documentation, repository creation, cloud provisioning, and deployment workflows involving intricate business logic.
- Engineered optimized data transformation algorithms with linear time complexity **O(N)** and minimal space overhead, resolving complex enterprise workflow bottlenecks efficiently.
- Developed **10+** production-grade GenAI prompts and AI-assisted workflows for automated code reviews, vulnerability analysis, and documentation generation, reducing security vulnerabilities by **50%** and improving operational efficiency by **40%**.
- Implemented advanced AI-assisted sanity testing workflows reducing test defects by **60%**, while maintaining **>85%** unit test coverage and high engineering quality standards.
- Resolved **4+** production-critical incidents through root cause analysis and zero-downtime hotfix deployments, improving platform reliability and stability.
- Consistently received the highest **5/5** appraisal rating with an **"A"** band for **3** consecutive years for high-impact technical contributions and delivery excellence.

W3Dev Private Limited

Software Engineer Intern (Web3)

May 2022 – Sep 2022

Kolkata, WB

- Architected and developed full-stack blockchain applications (dApps) and smart contracts leveraging **React.js**, **Node.js**, **Express.js**, and **Ethers.js**.

PROJECTS

MoonMind AI | [Live Demo](#) | [GitHub](#) | Python, OpenAI LLMs, Qdrant (Vector DB), RAG

May 2026

- Built a deterministic Retrieval-Augmented Generation (RAG) intelligence system with a multi-stage NLP pipeline (intent classification, hybrid retrieval, ranking) to transform static portfolios into queryable knowledge engines.

BlinkMart | [Live Demo](#) | [GitHub](#) | MongoDB, Express.js, React.js, Node.js (MERN)

Jan 2025

- Engineered a high-performance Quick Commerce web application featuring secure JWT-based user authentication, optimized product search, and seamless payment gateway integration.

EDUCATION

Techno Main Saltlake

B.Tech in Electrical Engineering | CGPA: 8.99/10.0

2019 - 2023

Kolkata, WB

CERTIFICATIONS

Cloud & Infrastructure: [Oracle Cloud Infra - Gen AI Professional](#) | [Azure Fundamentals \(AZ-900\)](#)

Software Engineering: [Gen AI for Software Developers \(IBM\)](#) | [IT Automation Using Python \(Google\)](#)
